

Welcome to Grafana Cloud

Our mission is to empower you to unite all your data — no matter where it lives — so your teams can analyze, take action, and make smart decisions. Here's your action plan to get set up right from the start.

Get your organization ready

Identify project stakeholders

Designate Grafana administrators

Invite admins to the org

Decisions to make up front

Set these once, then forget. The strategy and how-to for each lives in your [Onboarding Resources](#).

Billing safeguards

Designate a FinOps owner

Know your committed budget

Set up usage alerts

Stack rollout strategy

Single-stack vs multi-stack

Region & networking constraints

Access & governance

Configure SSO

Plan your RBAC strategy

Data access restrictions (LBAC)

First practical steps

1

Log in or sign up

Follow the link in your confirmation email to activate your Grafana account.

2

Select your organization

Choose it from the top-left dropdown list.

3

Deploy your stack

[Create a Cloud stack](#) in your region of choice.

Made your calls and deployed?

Dive into the how-to: stack topology, SSO, RBAC/LBAC, cost management, support & training.
